

## Embracing The Future With Smart Projector Wallcovering

Embrace the latest office trend by adding functionality to your surfaces with Smart Projector Wallcovering (Low Sheen, Dry Erase).

Smart Projector Wallcovering provides the user with the dual functionality of dry erase and projection meaning it brings a multitude of benefits to any company. The wallcovering changes with the company's needs which means one minute you can be giving a presentation with a projection on the wall, the next you can be making live website edits. Traditionally individual employees, staring at small screens, would work on a company's website only to have to edit this again once viewed by the next person. With Smart Projector Wallcovering the whole team can project the website onto the wall and use the dry erase functionality to note the changes they collectively want to make. With one surface, three functionalities you can meet all your office needs.

This product removes the need for a projector screen or whiteboard which reduces clutter, looks modern and means there's no need to put it away/ pull it out again when necessary. Smart Projector Wallcovering easily fits in with the 5 C's of office design (Comfort, Communicate, Coordinate, Continue (to evolve) and Challenge) while meeting the unique needs of each company. It is more crucial than ever to make sure employees are connecting and brainstorming with each other. How else can new ideas be made?

Most office trends are simply about making the room look nice and do little to actually impact how employees work or their productivity. Smart Projector Wallcovering both adds functionality to your surface and looks great in an office. This product helps transform traditional office into collaborative workplaces. The uses for Smart Projector Wallcovering are endless including enabling individuals need to carry out office presentations and groups to join together for brainstorming and collaborative meetings.

Smart Projector Wallcovering is ideal for creating large, whiteboard projection areas with a perfectly smooth surface. The product can be rapidly installed and hung vertically, horizontally or even on curved walls. You don't have to wait long to use your Smart Projector Wallcovering as it will be ready after just 24 hours. Coming in rolls of 10 m<sup>2</sup> and unlimited in how much area you can cover this wallcovering also has a 5 year performance guarantee.

Traditional whiteboards are limited in size which makes it difficult for large teams to work productively with only a small area to work upon. Smart Projector Wallcovering can cover an area as large as you want it to be meaning you are never limited with how much space you can work upon. The increasing number of millennials entering the workforce, a demographic who thrive on collaboration and their need to share everything, excel when communication tools like Smart Projector Wallcovering are made available to them.

Smart Projector Wallcovering can be used alongside other functional products including Smart Magnetic Plaster. This means with the purchase of just one bundle offices and meeting rooms can gain three functionalities for their surfaces; magnetic, whiteboard and projector. Functional surfaces are truly the future of office design and with a range of options available Smart Projector Wallcovering stands out as an easy to apply, quick to use and truly innovative solution for your surfaces. Abandon whiteboards and welcome functional surfaces!
